

Copilot Studio Integration Playbook

Intro to Copilot Studio

Microsoft Copilot Studio

Power Virtual Agents

Copilot Studio

Power Platform ecosystem tool designed to simplify the creation and customization of intelligent bots, through a user-friendly interface enhanced with AI

Microsoft Copilot Studio

Is a copilot just a chatbot…?

Conversational AI

Chatbot

Conversational experience using trained NLU models

- Common to be text based
- Data queried with APIs vs grounding
- Prebuilt content and topics by makers
- Embedded into sites, but siloed
- Context holding

Copilot

Evolution of chatbots as conversational assistants powered by large language models and generative AI to assist in your line of work.

Natural, multimodal interface	**Grounding in multiple data sources**	**Generative content capabilities**	**Contextual interactions**	**Responsiveness and adaptability**
Enables more than just text formats.	Works with your internal and external data sources	Generative AI powering Copilot building and response generation	Connected to the app experience it lays	Flexible to configure to context of experience.

Why Conversational AI

Growing number of communication channels

Need consistent messaging

Streamlined workforces

Higher workloads, capacity constraints, time-starved employees

Higher customer/ colleague demands

Greater urgency, higher expectations, and decreased satisfaction

Achieve more with automation through conversation

Optimize digital workforce

Faster time to value

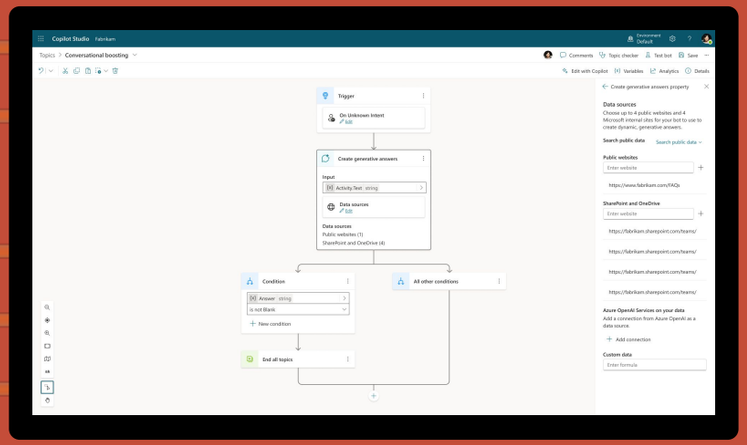

More time for innovation

Generative AI in Copilot Studio

Powered by Azure OpenAI Service

TO ANSWER

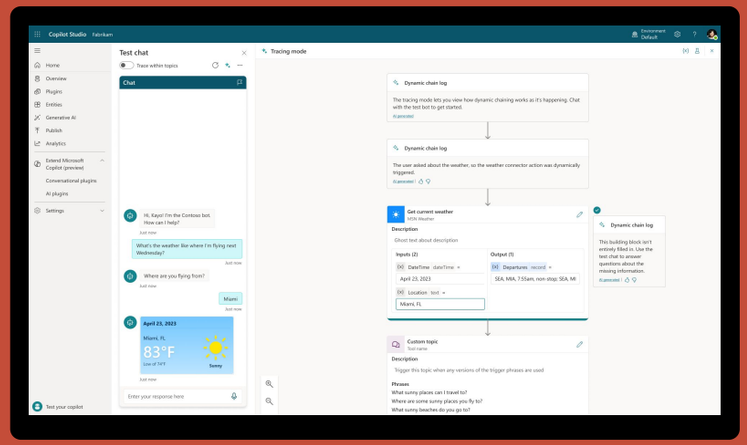

Generative Answers

Dynamically generate multi-turn answers based off an organization's content in real-time.

Public Preview

TO ACT

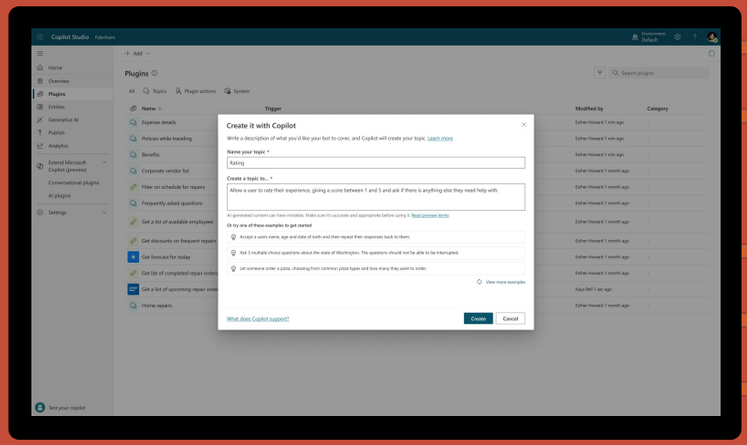

Generative Actions

Generate dialog and take action through dynamically chaining existing building blocks and plugins.

Public Preview

TO BUILD

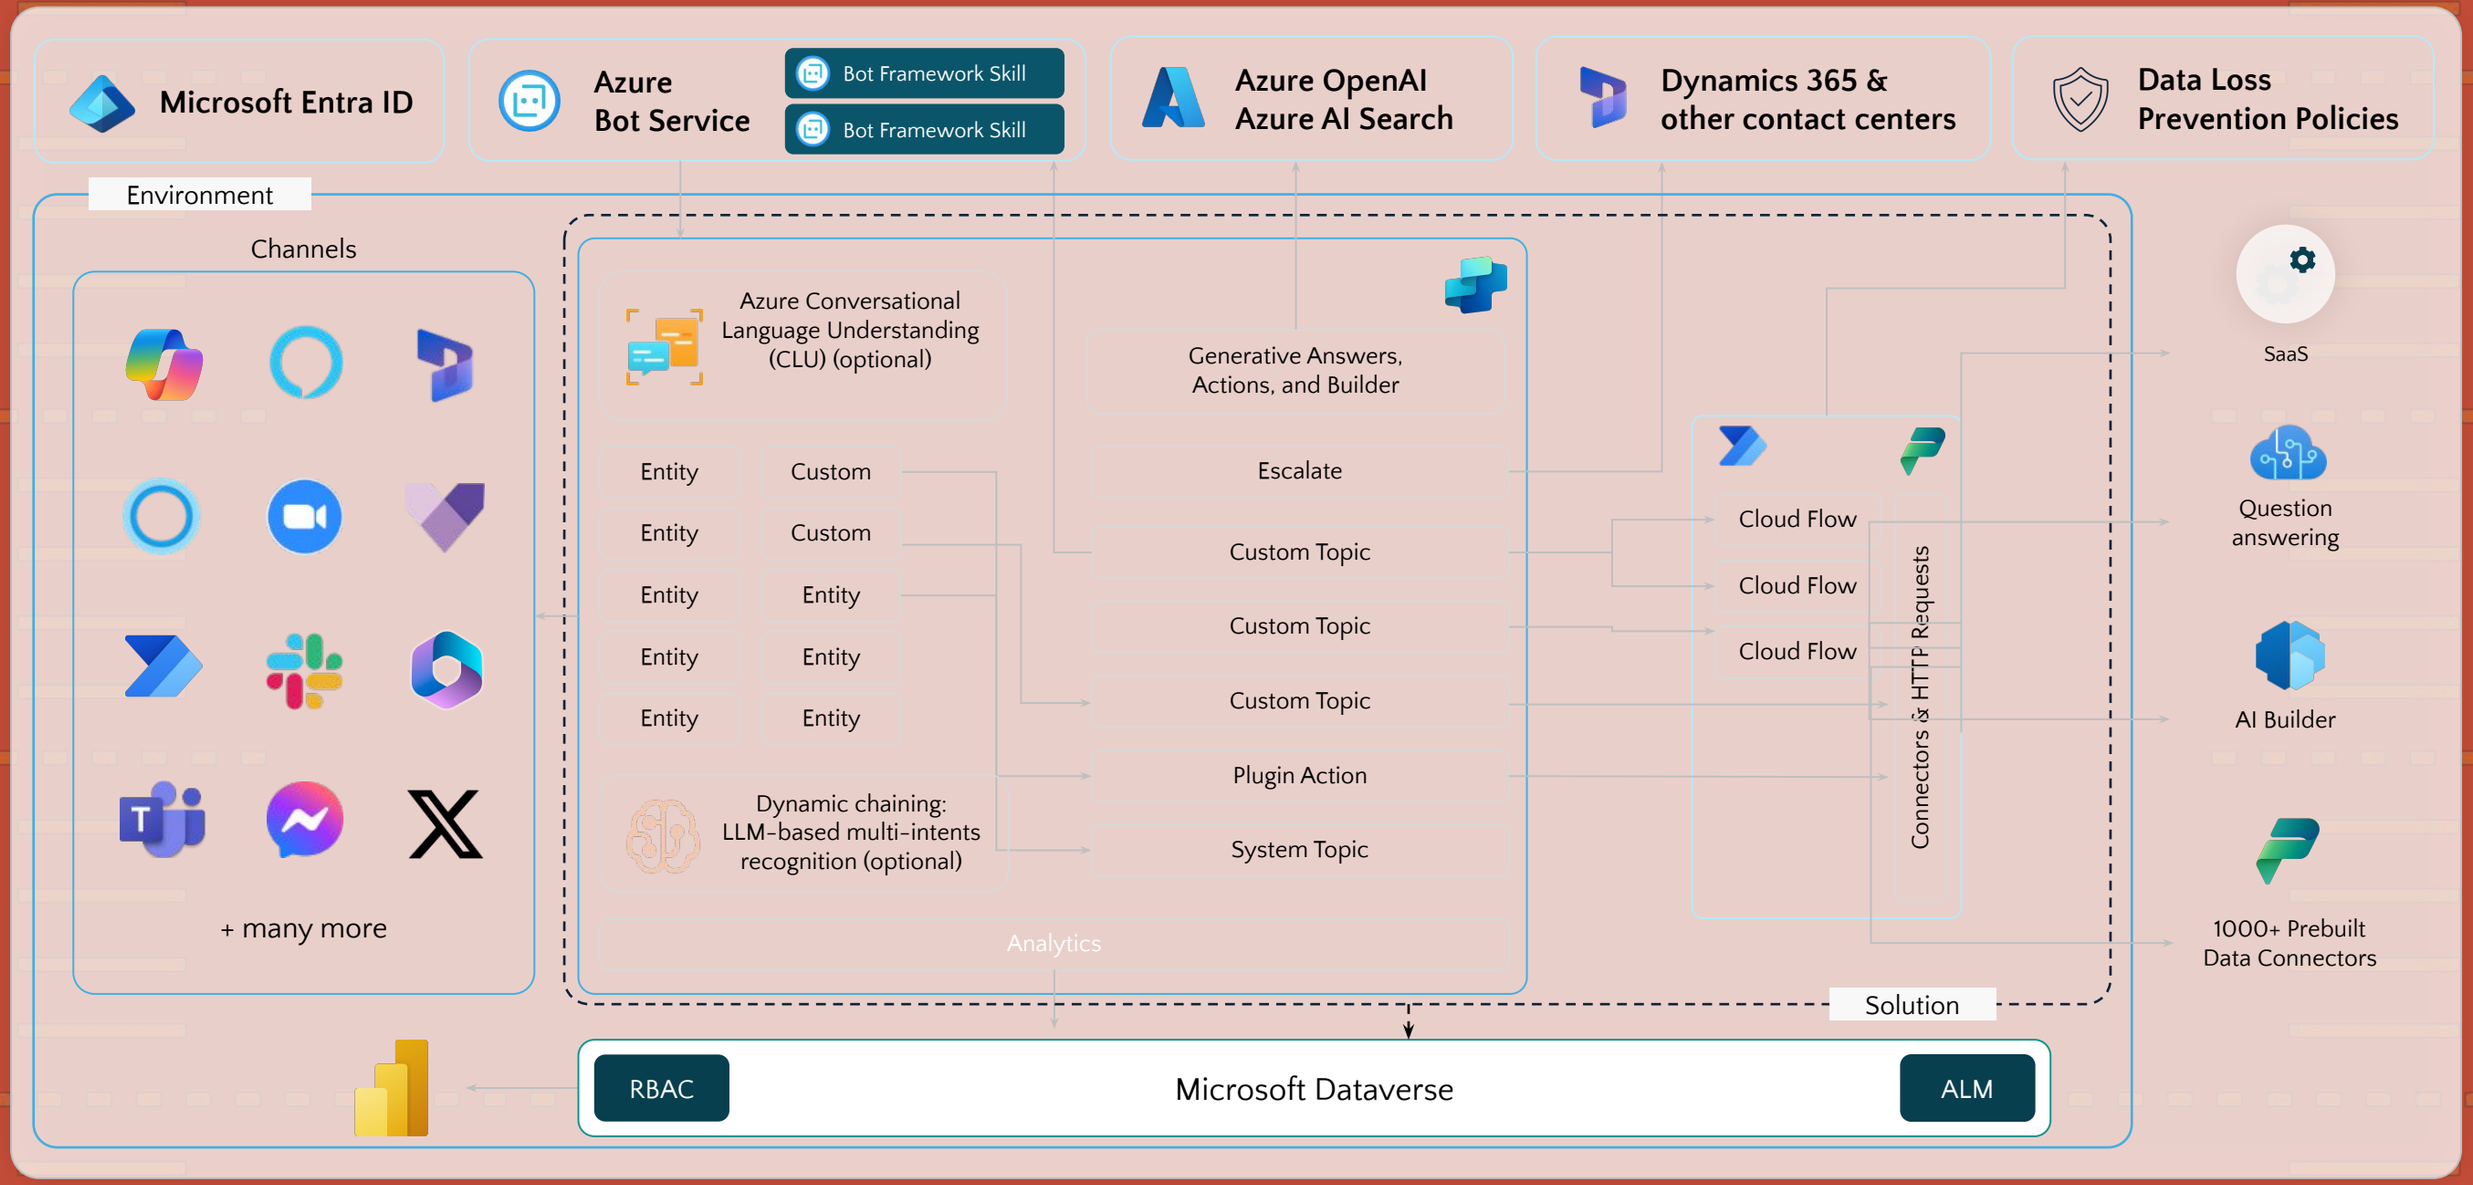

Generative Building

The Copilot assistant helps build, design and modify copilot topics through natural language.

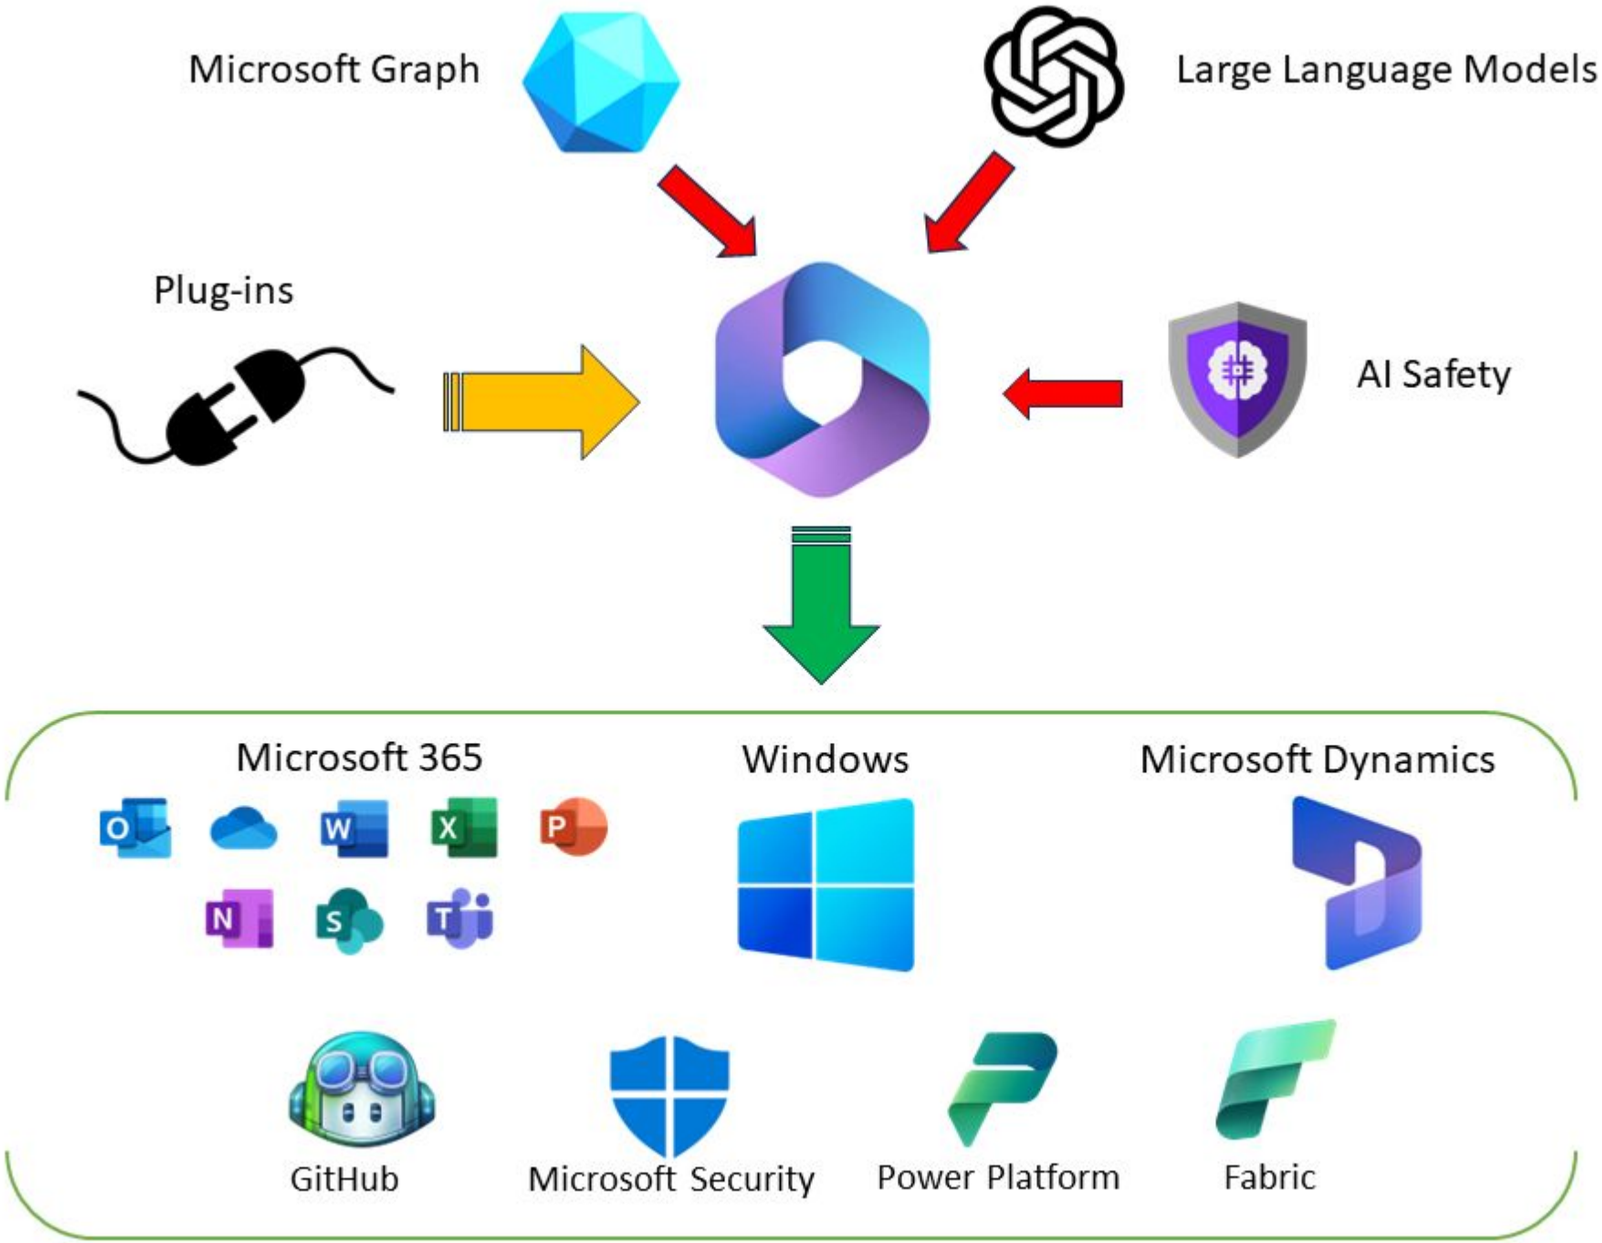

Generally Available

Copilot Studio Architecture

Integratio n Patterns

Microsoft Graph

Techorama Assistance ... | Overview | Knowledge | Topics | Actions | +3 | Publish | Settings | ... | Test

Your agent is ready! Here's what's next:

- Add actions so your agent can do things for you
- Add trigger so your agent can be activated by an event
- Publish your agent so others can use it

Actions

Techorama

Channels

Configure your agent channels to meet your customers where they are.

- Telephony
- Teams and Microsoft 365 Copilot
- Demo website
- Web app
- Native app
- Facebook
- Skype
- Slack
- Telegram
- Twilio
- Line
- GroupMe
- Direct Line Speech
- Email

Customer engagement hub

Connect to a customer engagement app to enable your agent to hand off a chat session to a live agent or other agent.

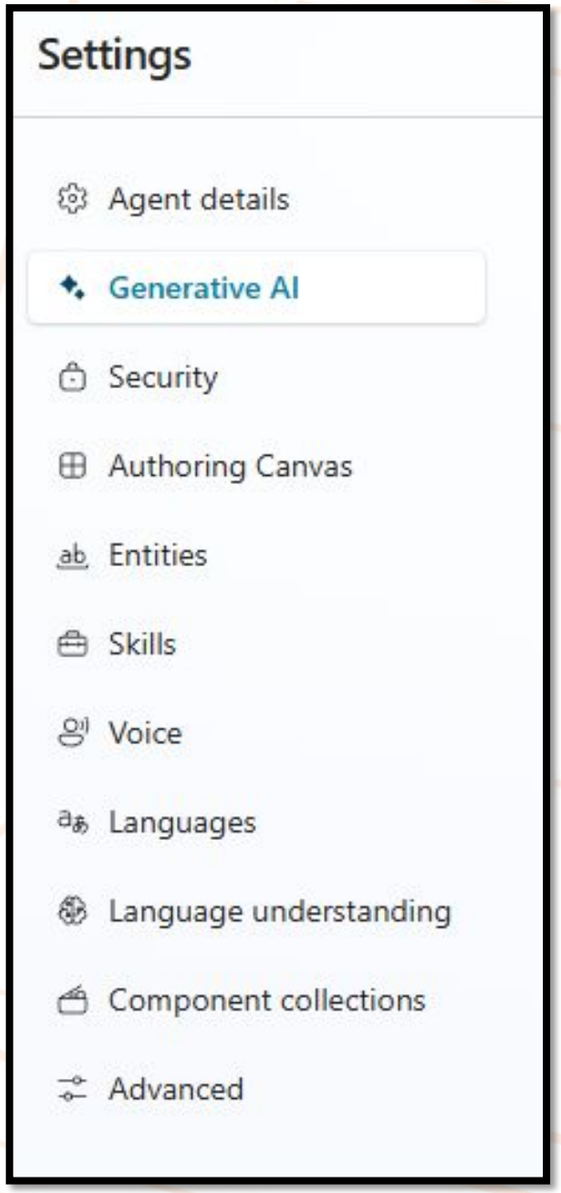

- Dynamics 365 Customer Service
- Genesys
- LivePerson
- Salesforce
- ServiceNow
- Custom engagement hub

Techorama

agenda

- Introduction
- Key Takeaways

Techorama

Using generative AI in conversations

How should your agent interact with people?

- ○ Classic – Use the topics you build to respond to trigger phrases—actions can only be called from inside a topic.
- ◉ Generative - Use generative AI to respond with the best combination of actions, topics, and knowledge.
  Learn more about how to optimize your agent.

How strict should the content moderation be?

○ Low - More creative ○ Medium - More balanced ◉ High - More precise

Image input
Users can upload images that agents can analyze and use to provide responses

Premium features

Enhanced search results

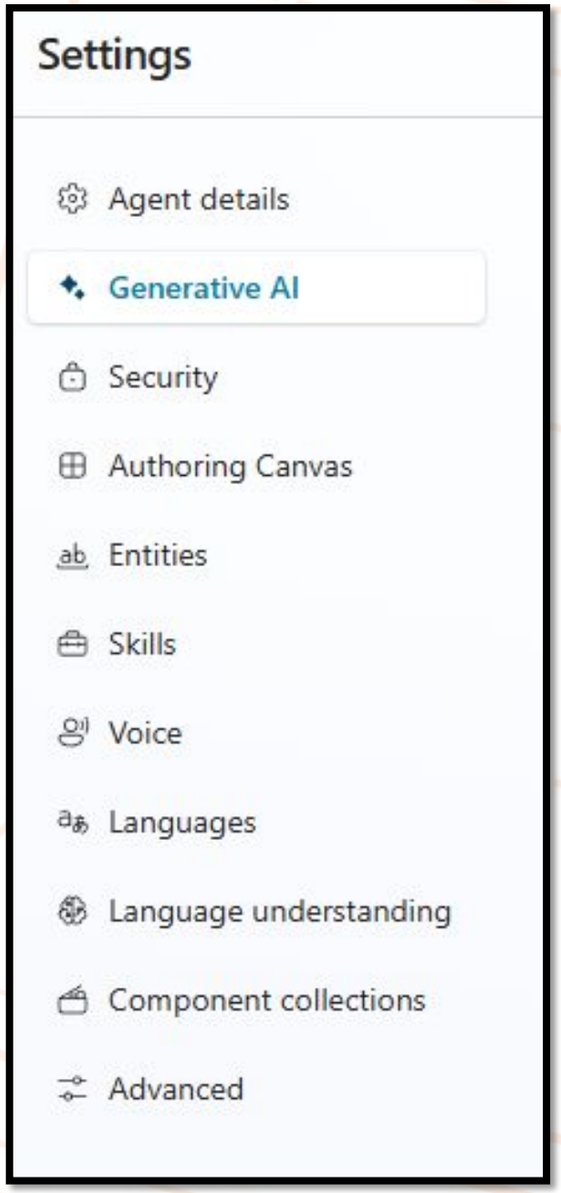

Can provide improved search performance for Microsoft 365 Copilot tenants. Availability varies by data source. Learn more

Enabled

Use deep reasoning models Preview

Enable deep reasoning for AI tasks. Learn more

Techorama

Authentication

When enabled, your agent will use the selected LLM's stored information and understanding to generate responses.

Choose an option

- ○ No authentication
  Publicly available in any channel
- ◉ Authenticate with Microsoft
  Entra ID authentication in Microsoft Teams, Power Apps, or Microsoft 365 Copilot
- ○ Authenticate manually
  Set up authentication for any channel

- Language understanding
- Component collections
- Advanced

Add your first skill

Skills extend your agent's conversational capabilities by automating a series of actions within a topic. They enable the agent to book an appointment, send a confirmation email, manage tasks, and more.

Copilot Creation Process overview

Design Considerations & Best Practices

definitions & key concepts

Best practices

Understand your user

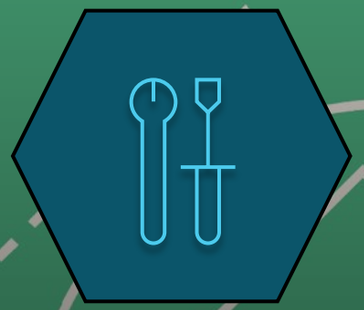

Keep it simple and clear

Be inclusive

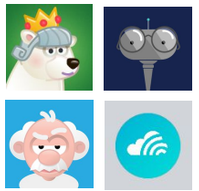

Personality is important

Use the right tools

Techorama

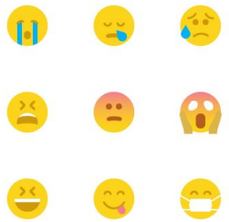

Bot brand & personality

What's my name?

Nicky

How do I look and react?

How should I sound?

When should I ask for help?

Techorama

What makes a copilot successful?

Knowing your customer

Having accurate, latest and effective content

Knowing when to hand off to a human

Understanding the customer's request and connecting it to the right topic

Providing personalized, context-aware help, and taking actions for the customer
